

Company Name: ProProcure Limited - www.proprocure.com

Location: Gerrards Cross, Buckinghamshire SL9 8BQ

Salary Package: D.O.E + benefits

Job Title: Web Developer (Senior/Mid level) - C#, Angular

Our Story.....

ProProcure is a SaaS technology company that helps large businesses to become better at managing their business expenditure.

Our cloud based product Geneus - helps businesses simplify how they buy, and controls how suppliers sell to them. Geneus is used by many global businesses in the consumer goods, food and beverage, and foodservice sectors, and we have exciting plans to expand our customer base over the next 2 years through direct sales and channel partnerships.

Working for us.....

ProProcure has a great business culture focused on delivering a collaborative environment for our employees to foster new ideas and which enables our business and our employees to develop and grow.

We have 4 key values:

- Being Committed, to each other and to delivering outstanding customer service
- Working with Integrity, delivering on our promises
- Being Nimble in our approach and methodologies – make it simple
- We all perform our roles with Passion, purpose, and a positive attitude

The Role.....

Key Skills....

C#, Angular 2+, TypeScript, webpack, REST API, TDD, HTML5, CSS3, SASS, WCF, Asp.Net/Vb.Net, NHibernate, SQL Server, SVN

The Role.....

We are an established industry-leading software house that develops sophisticated customised web portals using Microsoft tools and technologies. Our platform is used globally for prestigious multilingual global clients and we have received international acclaim and awards for being the best of breed in terms of functionality, look and feel and quality

ProProcure[®]

We are looking for a web developer to join us in supporting the existing in-house team by maintaining the existing systems/applications/interfaces, technologies and tools and helping with new rollouts and releases and building new functionality.

As the ideal candidate, you would have experience of working with Angular 2+, webpack, C# and SQL Server as you will play a key part in the process of migrating to a new Angular 4 Front End tech stack driven by RESTful .NET APIs, whilst supporting the existing ASP.Net platform.

This is a hands on programming role working in a team responsible for the development of end to end lifecycle of our systems, in addition, you should have good analytical & design skills and experience and ideas as you will form part of the technical group that discusses, develops and implements new functionality into our products and looks at new technical frameworks, including looking at mobile and new web framework technologies.

We offer a relaxed yet challenging environment in an established and professional can-do culture, an accessible office location, and a supportive (Agile, Kanban) structured IT team within a company which is just the right size that the right candidate with the right ambition and ideas can really make a difference.

We hope you will share the enthusiasm and passion we have for our business and decide to come and find out more. If so, please send your CV in the first instance to careers@proprocure.co.uk.
