

**Company Name:** ProProcure Limited - [www.proprocure.com](http://www.proprocure.com)

**Location:** Spaces, 1 Chalfont Park, Gerrards Cross, Bucks SL9 0BG

**Job Title:** Software Developer

## The Company

ProProcure is a specialist B2B technology provider in the procurement software industry.

Our new cloud-based quote-building tool, G-Quotes, brings enterprises and their suppliers together through collaborative purchasing. We recognise the challenges surrounding the industry and have built our solution to help businesses across the globe achieve their full purchase-automation potential. We have recently partnered with one of the worlds largest eProcurement solution providers to help not only our customers be the best at what they do, but theirs too.

We are small but ambitious and have exciting plans to expand our G-Quotes client base over the next 2 years as we push into our next stage of growth.

## Working for us

At ProProcure we strive to have a dynamic culture and believe that by empowering individuals and encouraging cross-functional teamwork we have created an environment where everyone can excel and bring their own skills and knowledge to the table (as well as learning new ones!).

The true culture of our business is reflected in our values:

- Integrity - Demonstrating openness and honesty at all times
- Passion - Believing in our business and caring for our Clients
- Respect - Recognising each other's differences and strengths

---

## The role

- Understanding requirements and designing appropriate end-to-end solutions.
- Providing estimates for implementation timelines of solutions & fixes.
- Implementing fast, efficient, reliable and scalable solutions using appropriate technologies
- Maintaining and improving our front-end and back-end architectures, coding standards and best practices.
- Performing code reviews.

## Who are we looking for

You should ideally have a track record of developing business applications with strong Agile and development skills. A fast learner, who will be able to contribute quickly, and with a genuine passion for software development. You will need clear written and verbal communications skills and be fluent in english.

You will have a natural attention to detail and be able to maintain high standards when under pressure.

---

**The following skills/attributes are desirable:**

- Strong knowledge of OO programming, Angular 6+, Typescript, HTML, SCSS, C#.Net, LINQ, JSON and XML
  - Any experience of the following would be an advantage: SQL, VB.Net, TDD, DDD, nHibernate/Entity Framework, REST APIs
  - Past usage of the following tools would also be advantageous: Github, SVN, TeamCity, Octopus, Postman, Visual Studio
- 

We offer flexible working, predominantly home-based and a competitive package.

We hope you will share the enthusiasm and passion we have for our business and decide to come and find out more. If you are interested, please send your CV and a cover letter to [careers@proprocure.co.uk](mailto:careers@proprocure.co.uk).
